

The diagram illustrates a network structure with three nodes on the left, labeled 'distinctions', and ten nodes on the right, labeled 'relation faces'. The nodes on the left are AIBL (large blue circle), AIBLAVEL (small blue circle), and AIBLAVAL (small blue circle). The nodes on the right are labeled with their degree: deg 2, deg 2, deg 3, deg 2, deg 2, deg 2, deg 3, deg 3, deg 3, and deg 4. The connections are color-coded: blue lines connect AIBL to the first six 'relation faces' (all deg 2); orange lines connect AIBLAVEL to the first six 'relation faces' (all deg 2); and red lines connect AIBLAVAL to the last four 'relation faces' (deg 3, deg 3, deg 3, deg 4). Additionally, there are cross-connections: AIBL connects to the two deg 3 faces and the deg 4 face via orange lines; AIBLAVEL connects to the two deg 3 faces and the deg 4 face via red lines; and AIBLAVAL connects to the two deg 2 faces and the deg 3 face via blue lines.

face degree (number of distinctions joined)	number of faces
2	7
3	4
4	1

A bar chart with 'relation faces' on the y-axis (0 to 6) and two categories on the x-axis: 'kept (degree 2)' and 'discarded (degree > 2)'. The 'kept' bar is blue and has a value of 4. The 'discarded' bar is orange and has a value of 5.

Category	relation faces
kept (degree 2)	4
discarded (degree > 2)	5
