

a 100 mM NaCl (attractant)
 $\Phi=233$, 15 distinctions, 4163 relations

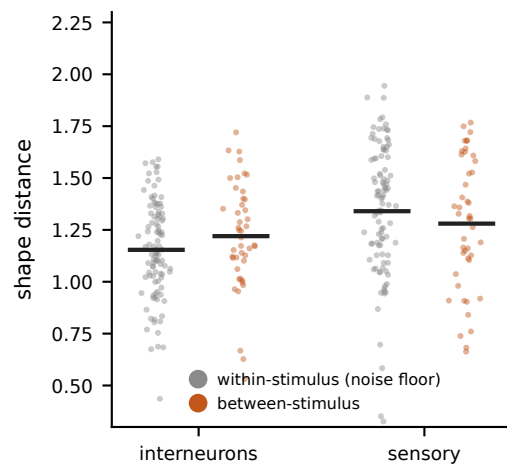

b 450 mM NaCl (repellent)
 $\Phi=157$, 15 distinctions, 2871 relations

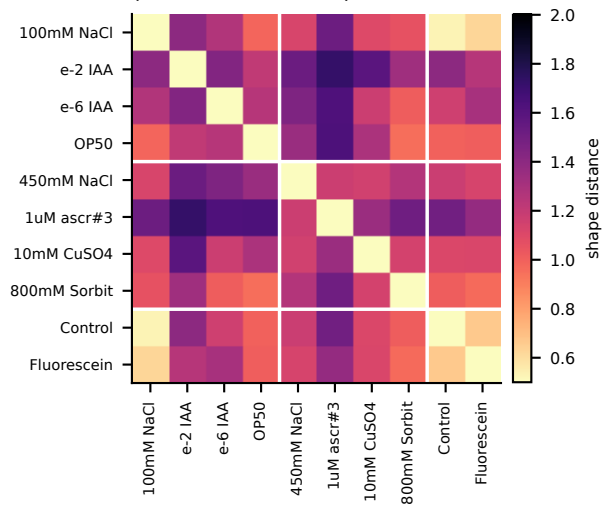

c The 15 distinction labels are the 15 non-empty subsets of the same 4 neurons

d Between-stimulus distances sit AT the within-stimulus noise floor

e Interneurons
(noise floor = 1.15)

f Sensory
(noise floor = 1.34)
