

a Filled triangle

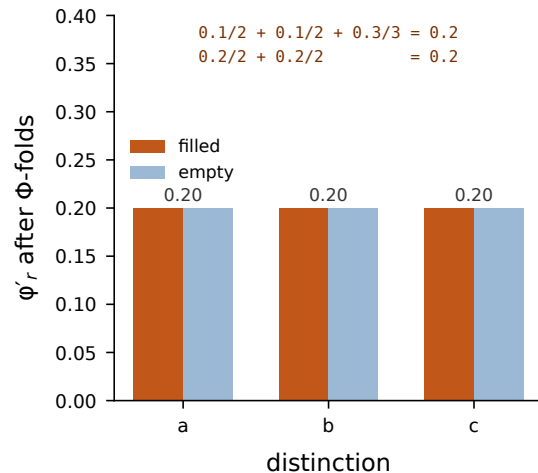

3 pairwise relations, $\phi_r=0.1$ each
+ 1 degree-3 relation, $\phi_r=0.3$
 $\Phi = 1.5$

b Empty triangle

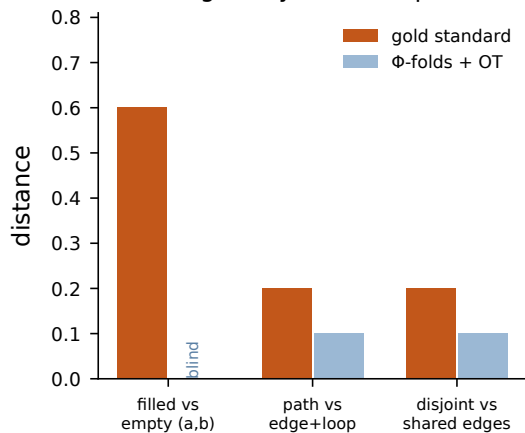

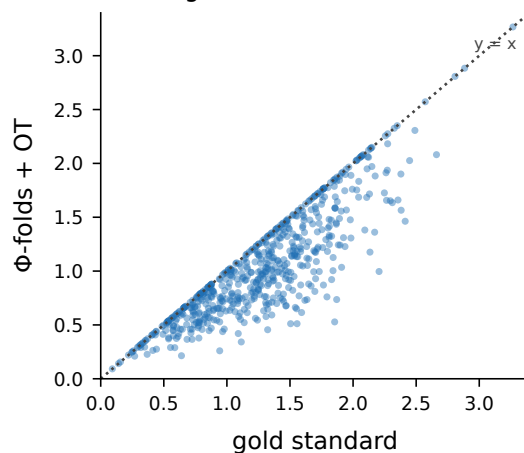

3 pairwise relations, $\phi_r=0.2$ each
no degree-3 relation
 $\Phi = 1.5$

c Both fold to the same vector

d Folding always under-reports

e 600 random pairs: never above the diagonal ($r = 0.87$)

f The kernel grows exponentially
